To all our Patients, their Family and Friends:

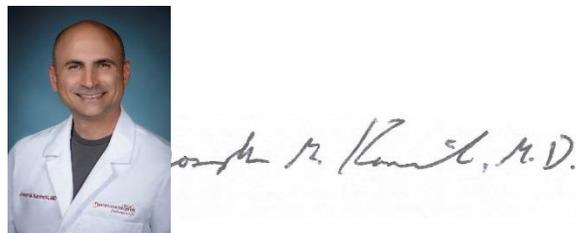

Doctors Dattoli and Kaminski are proud to announce the formation of their new nutraceutical company- D & K Brands, LLC. As you know the Dattoli Cancer Center is world renowned for the treatment of prostate cancer and care provided to their patients. The doctors will bring the same expertise and skills to the nutraceutical business.

D & K now design, develop, manufacture and sell proprietary pharmaceutical grade supplements intended for patients with cancer or at risk for recurrence of cancer, and for people with other medical ailments where nutritional supplementation is important. In addition, standard supplements (such as vitamin D) will be developed in the same way as their proprietary formulations.

In addition to this panoply of diagnostic and treatment refinements, we are going beyond the disease itself to “treat” our patients holistically with helpful supplements and vitamins. We have long been passionate about the use of quality supplements to potentially thwart malignancies from the beginning, as well as slowing cancer growth, improving bone strength and upregulating the immune system. Following many years of R & D, we recently introduced a proprietary line of these supplements to the public, under the name “D & K Brands.” These “prescription grade” and 3rd party validated products are a boon to an industry that is woefully bereft of important regulation. Far too many over-the-counter supplements have been found to contain little of the actual ingredients they claim. Some are actually unsafe concoctions and can result in adverse interactions with prescribed medications. Many even contain impurities, especially prescription drugs, since they are packaged at pharmaceutical plants. Even products which claim to be “pharmaceutical grade” have failed third-party validation. Information about our uniquely created products is available at www.dandksupplements.com. You can rest assured that they are of the highest quality, safe, pure and manufactured at FDA approved facilities under the strictest GMP standards. All D and K products are rigorously third party validated.

Michael Dattoli, M.D.

Joseph Kaminski, M.D.
